Projects

Freelancing
Made a website for a Startup Company
Mar 2023
A website for "SAOC IT Solutions" and hosted it online.
Link: https://saocits.com/ ⌇

Translator
Made by using JavaScript
A translator that translates normal English to Shakespeare's English using a JavaScript API.
Link: https://talkdifferent.netlify.app/ ⌇

Attendance System using OpenCV
Made as a part of Microsoft Engage program
May 2022 – Jul 2022
- A system that marks attendance of a student by their faces.
- Photographs of all the enrolled students in that college/school was saved it in the database.
- The student is made to stand in front of a camera and their current picture is compared with the already stored photographs in the database. If it's a match, the student is marked present, else not.

Passenger Counter App
Made by using HTML, CSS and JavaScript
- A web app that shows the count of the passengers who entered the subway on a particular day.
- Increments the count whenever a passenger passes by the subway, saves it and shows the previous entries as well.
Link: https://pcounterapp.netlify.app/ ⌇

Co Curricular

- Serving as a Content Lead at GeeksforGeeks student chapter of my college for the past year.
- A part of the oldest technical club of my college, the Technovation Club.
